For this assignment, you need to create the [hangman game](#) you might have played in your school days.

The idea is simple, choose a random word or words and allow users to guess that word in limited amount of moves. You can on the above link to know more about the rules of the game.

[Click Here for GIF](#)

Note:

- The design above is just for reference and you can design your own UI. Be creative.
- The functionality is important, the user should be able to type the letters of click on different letters like shown above, and the game should play out accordingly.
- Think about how you can achieve the hangman figure on your page using HTML, CSS etc.
- Use correct approach for the task (use ES6) and make your source code readable and organized.
